**Photo Slideshow
Planning Form**

GETTING STARTED

- Print this page to plan your video.
- FIRST choose your music. You can provide the music as mp3 files or on CD.
- As a general rule, use 10 photos per minute of music, but you can vary this as you like. We will edit your photos to fit the music.
- Organize your music and photos BEFORE numbering.
- For paper photos (up to 8x10), number each photo on the back in the lower corner (never the center). Use a pencil or ballpoint pen (**never use a marker or gel pen**). Each photo must have a unique, sequential number on the back (can't have two #12 photos). Avoid using paper clips.
- For digital photos, rename each file with the number of its position in your video. You can mix paper and digital photos. Digital images can be sent on a USB drive or via a file sharing service like Dropbox.
- OPTION: If you prefer to have ALL the photos appear randomly, then there's no need to number them.
- For more info on slideshows and other photo options, visit www.VideoMVP.com.
